

# Introducing A New Modular Headwall Concept from Artisan Display, Inc.

Pretty is NICE...

**BUT**

what's inside  
your headwall?

**Artisan will custom design, fabricate and install modular headwall units for use in any room in your facility — from basic exam rooms to ED, ICU and CCU areas complete with all:**

- MED-GAS
- Emergency outlets
- Normal power outlets
- Call station boxes
- Light switches
- AV and data boxes
- TV screens.

**Once installed, ALL of your connections are easily accessible and efficiently completed through the top of the headwall units.**

**Electric and MED-GAS  
single point of connection.**

**Our units are completely tested and certified to meet the most stringent hospital standards and fully customized to meet your needs including:**

- **UL Certification**
- **Med/Gas are installed sealed for line pressure and cleanliness testing**
- **Electrical wiring is fully configured and marked to your circuitry requirements**
- **All EMT Conduit**
- **Covering of your choice**
  - **Solid Surface**
  - **Composites**
  - **Resins**
  - **Thermofoil**
  - **Laminates**
- **Highest level of Union craftsmanship, constructed and installed with pride.**

Headwall units can be single or multiple panels and mounted inside the wall or outside the wall. A back to back configuration is also possible. This Patent Pending approach, which is already in use at a nationally recognized children's hospital, will quickly become the industry standard.

Artisan Display has once again demonstrated why we have become leaders within our industry through innovative ideas and cost-effective approaches.
